

STATE SHOOT REQUIREMENT

(Please Read Carefully!)

To: State Associations & Clubs holding State Championships
From: Amber Schwarz, NSSA Club Secretary
Subject: Reporting State Winners

NSSA has an extremely difficult time in determining the “correct” winners for state championships, whether they be Open or State winners. The three (3) areas of concern for most of our members are how these winners are determined and reported in the **Records Annual**, the **Scoreboard section** of the *Skeet Shooting Review*, and **ALL-American Point accumulation**.

To help us hit all three areas properly, this form is a requirement of all state shoots. Please fill this out this State Winners form with State winners only, and enclose when you submit your state shoot to headquarters.

If you are unsure about which category your state shoot falls into, the following examples are available. Remember- ALL state shoots are required to complete this form!

Open State Shoot - By far the most popular, this type of state shoot opens their normal state borders to anyone who wishes to participate, much like a normal Open shoot. The association or club will report the Open results to NSSA with Open awards only, since this is the type of shoot being run. The association or club will also submit the State winners on the State Winners form to be enclosed with the shoot. This will ensure that the State winners are reported in the Records Annual, the Open results are printed in the Scoreboard section of the Skeet shooting Review, and All- American Points are disbursed to ALL participants using the Open awards.

Closed State Shoots – Perhaps the simplest to report, the closed state shoot only allows state residents to participate. Since the awards can only be distributed to in-state shooters, the Results reported to NSSA and the State Winners listed on the Records Annual form are one in the same.

Open & Closed State Shoots – This type of state shoot may “look like” any other shoot, but has many differences. Headquarters (notified in advance) will issue a completely different shoot number for both the State residents, and the non-residents. Shoot management will keep all results completely separate and will report it as two different shoots which are occurring at the same time. Under no circumstances are the State residents to shootoff for any title with a non-resident. If they did, then this would be an Open shoot. The State Winners form for the Records Annual would only contain the results from the state shoot.

State Winners

for NSSA Records Annual

State Name: _____ Date: _____ Shoot no. _____

Please fill in this form with the "State Champions" from your state shoot for the Records Annual which is published in March. NSSA Headquarters can discern the Open winners from the shoot report, but because Open State shoots may also have Non-resident winners, you need to fill these sheets with State resident winners ONLY. This is a shoot reporting requirement for all State Shoots.

Example: Matt from Ohio travels to the Arkansas State Shoot and wins Open Champion in the 28 gauge. The Runner-up is Jim from Arkansas. Since Jim is the highest State competitor, he must be listed as the Arkansas 28 gauge Champion on this sheet. Matt will still be listed in the monthly issue of the *Skeet Shooting Review* as the Open 28 gauge Champion because he was the true Open winner, but Jim receives credit in the Record Annual as being the highest State resident winner.
